X3

Technical Data

Case Type	Midi-Tower
Form Factor	ATX, M-ATX
5.25 inch drive bay external	1 x
3.5 inch drive bay internal	2 x
Case fan (rear)	1 x 80 mm
Height x Width x Depth	408 x 175 x 410 mm
Weight	3.4 kg
Material	0.5 mm steel
Maximum VGA Card Length	350 mm
Maximum height of CPU coolers	145 mm
Code	4250140356659
Manufacturer number	CT X3

Logistical Data

Höhe (Verpackung)	490 mm
Breite (Verpackung)	230 mm
Tiefe (Verpackung)	515 mm
Bruttogewicht (Verpackung)	4,5 kg
Stück pro Palette	28
Zolltarifnummer	84733080000

Cooltek X2 Midi Tower, ATX, 1 x USB 3.0, 1 x USB 2.0, schwarz

With the X3, we expanded our portfolio to include a functional, elegant and cost-effective standard mid tower. A special feature is the practical sound insulation that makes the X3 the ideal base for a particularly quiet office computer.

The front enclosure is a real eye-catcher - the central part of the plastic front is inspired by the appearance of brushed aluminum, giving the X3 a particularly elegant look. One external 5.25 "drive bay can be found at the top of the front, which is equipped with a flip-down panel. This ensures a consistent look, even if a different colored optical drive should be used. All conventional drives with tray drawer can be installed.

The chassis of the X3 is made from 0.5 mm thick steel and is carefully painted matte black. The case is characterized by a valent processed steel chassis - carefully folded and deburred edges protect against cuts when installing the hardware. The front cover and the side panels of the X3 are insulated with sound-absorbing foam.

The easily accessible I/O panel with 1 x USB 3.0, 1 x USB 2.0 and HD Audio ports can be found at the top of the front panel. Appropriate peripheral devices can quickly and easily be connected from the front. The reset button can be found here as well. The power button is located in the upper right corner of the front, the Power and HDD LED in the upper left corner.

Internally, the X3 offers a HDD cage for up to two 3.5 inch drives. The drives are secured with screws. If you like to mount a 2.5 inch drive, a suitable installation space is located between 5.25 inch and 3.5 inch drive bay.

The Cooltek X3 is designed to minimize noise emissions. A pre-installed 80mm fan in the rear removes the heated air from the case interior. The X3 allows the installation of VGA cards with a maximum length of about 350 mm.

The X3 is designed for all conventional ATX power supplies. The power supply is installed at the top of the rear panel of the X3. Seven PCI expansion slots are available at the back of the case. ATX and Micro ATX motherboards can be installed in the case.
